✍️ EXPERIENCE

Bloom Institute of Technology | Technical Project Manger

Educational Technology | May 2019 - Present

- Remotely on-boarded 400+ junior web developers and data science engineers each month into cross-functional product teams, across various time zones, to build features for non-profit organizations
- Developed and taught personalized curriculum on Git workflow, User Experience and accessibility fundamentals, and cross-functional design patterns
- Worked directly with technical teams and individual developers to diagnose blockers and successfully deploy fully functional applications developed with ReactJS and data modeling with FastAPI
- Through text descriptions, data visualizations and video, thoroughly developed and maintained the official technical documentation for the Build Weeks module of the curriculum for both learners and instructors
- Worked with CRM tools such as Salesforce, Airtable, and Canvas to fully integrate with internal systems and records across the school

Lambda School | Teaching Assistant

Web Development | November 2018 - May 2019

- Helped build and deliver a brand new curriculum on the school's capstone project, otherwise known as the Labs Project
- Served as de facto scrum master / project manager while conducting daily stand-ups with a number of teams, upwards of a dozen a day, leveraging tools like Zoom and Slack
- Setup custom bundling and continuous integration solutions for products via Github, Docker and various testing suites

Magic Death Sounds | Digital Operations

Record Label & Distribution | January 2012 - August 2016

- Established the entire online commerce platform, primarily through Shopify with custom Liquid templating
- Managed promoted and targeted advertisements with Google AdWords and promoted social media placement
- Developed the label's primary web presence in custom Wordpress and PHP, as well as across other platforms including YouTube and Discogs

⌨️ SKILLS

- Full Stack Web Development (Modern Javascript, ReactJS, NodeJS, SQL, testing and deployment)
- Instructional Design
- UX / UI
- Technical Documentation
- Web Accessibility
- User Interface Design

🎓 EDUCATION

- Full Stack Web Development (2019), Lambda School
- AS Computer Information Systems, Camden County College (2008)
